

A scatter plot showing the distribution of P_Change values for Wins (blue dots) and Losses (red dots). The x-axis is labeled 'P_Change' and ranges from -0.01 to 0.04. The y-axis is unlabeled. Wins are clustered around P_Change = -0.005, while Losses are clustered around P_Change = 0.00. There is a significant overlap between the two groups in the central region.
