

A scatter plot showing the distribution of Wins (blue dots) and Losses (red dots) for the 2016-17 season. The x-axis represents a numerical value, ranging from -0.015 to 0.010. The y-axis represents another numerical value, ranging from -0.010 to 0.010. The plot shows a dense cluster of points around the origin (0,0), with Wins generally concentrated in the lower half and Losses in the upper half. There are also several outliers, particularly Wins at negative x-values and Losses at positive x-values.
