

A scatter plot showing the relationship between 'Stochastic (14)' on the x-axis and 'Wins' (blue dots) and 'Losses' (red dots) on the y-axis. The x-axis ranges from 0.0 to 1.0, and the y-axis ranges from 0.0 to 1.0. The plot shows a dense distribution of points, with a notable concentration of 'Wins' (blue) at higher 'Stochastic (14)' values (above 0.6) and 'Losses' (red) at lower 'Stochastic (14)' values (below 0.4). There is also a significant cluster of points near the origin (0.0, 0.0).
