

A scatter plot showing the relationship between 'Stochastic (14)' on the x-axis and two categories: 'Wins' (blue dots) and 'Losses' (red dots). The x-axis ranges from 0.0 to 1.0. The y-axis is unlabeled but represents the frequency or count of wins and losses. The plot shows a general upward trend for both categories as the x-value increases, with a significant concentration of points at the higher end of the x-axis (above 0.6).
