

A scatter plot showing the relationship between Stochastic (14) on the x-axis and Stochastic (15) on the y-axis. The x-axis ranges from 0.0 to 1.0, and the y-axis ranges from 0.0 to 1.0. Blue dots represent 'Wins' and red dots represent 'Losses'. The plot shows a general positive correlation, with a higher density of points in the upper right quadrant (high Stochastic (14) and high Stochastic (15)). There is a notable cluster of points near (0.1, 0.1) and another near (0.9, 0.9).

0.0                      0.2                      0.4                      0.6                      0.8                      1.0
