

A scatter plot showing the relationship between 'Stochastic (14)' (X-axis) and 'Wins' (blue dots) and 'Losses' (red dots). The X-axis ranges from 0.0 to 1.0, and the Y-axis ranges from 0 to 10. The plot shows a general upward trend for both Wins and Losses as Stochastic (14) increases, with Wins generally higher than Losses for values above 0.5.
