

A scatter plot showing the results of 100 trials. The x-axis represents the probability of success, ranging from 0.0 to 1.0. The y-axis represents the number of trials, ranging from 0 to 100. Blue dots represent 'Wins' and red dots represent 'Losses'. The plot shows a clear separation between the two groups, with 'Wins' generally occurring at higher probabilities and 'Losses' at lower probabilities. A legend in the bottom right corner identifies the colors: blue for 'Wins' and red for 'Losses'.
