

A scatter plot showing the relationship between Wins (blue dots) and Losses (red dots) for 100 players. The x-axis represents the proportion of wins, ranging from 0.0 to 1.0. The y-axis represents the proportion of losses, also ranging from 0.0 to 1.0. The plot shows a clear negative correlation, with most players having a high proportion of wins and a low proportion of losses, or vice versa. A legend in the bottom right corner identifies the blue dots as 'Wins' and the red dots as 'Losses'.
