

A scatter plot showing the relationship between Stochastic (14) on the x-axis and Stochastic (15) on the y-axis. The x-axis ranges from 0.0 to 1.0, and the y-axis ranges from 0.0 to 1.0. Data points are categorized into 'Wins' (blue dots) and 'Losses' (red dots). The plot shows a dense distribution of points, with a higher concentration of 'Wins' in the upper right quadrant and 'Losses' in the lower left quadrant. A legend in the bottom right corner identifies the colors: blue for 'Wins' and red for 'Losses'.
