

A scatter plot showing the results of 100 games. The x-axis represents the probability of winning, ranging from 0.0 to 1.0. The y-axis represents the frequency of outcomes, ranging from 0 to 100. Blue dots represent 'Wins' and red dots represent 'Losses'. The plot shows a distribution of outcomes, with a higher density of wins at higher probabilities and a higher density of losses at lower probabilities. A legend in the bottom right corner identifies the blue dots as 'Wins' and the red dots as 'Losses'.
